

Alexandra Park Case Study

Client

Alexandra Park

Project Architect

Guy Phoenix

Brick type

Yorkshire Red Blend
Mandarin Mixture

Location

Nottingham

Sector

Residential

The Challenge

A new development of 15 individually designed four and five-bedroomed homes set in over four acres of mature woodlands in Nottingham. Each home in this secluded development was to be built over three storeys and designed and styled with the latest contemporary finishes, both inside and out. With a gated entrance, the private development is set down into its own valley, but still has breath-taking views of the city.

The Solution

Forterra's Mandarin Mixture and Yorkshire Red Blend was chosen to meet the development's high specification requirements. The properties were economically designed with underfloor heating, air source heat pumps, and a high level of insulation to keep running costs down.

The Benefits

Including the latest interior finishes, each home also offers something different, from cinema rooms to beautifully landscaped terraces.
