

Brinkworth Case Study

Client
Brinkworth

Project Architect
Brinkworth

Brick type
Dark Moroccan Smooth

Location
London

Sector
Residential

The Challenge

Commissioned in north London in 2010, this new-build project within a conservation area needed to be discrete and respectful to fit in with the surrounding environment.

The Solution

Forterra's Dark Moroccan Smooth brick was used to adhere to the necessary requirements along with a pitched roof and flush and square bay windows.

The Benefits

Visually striking, the sculptural ceiling adds to the dining experience. The post-modernist build respects the immediate environment with regard to both material and form.

This build was shortlisted for the 2017 BDA Brick Awards in the Individual Housing Development category.
